TITLE INDEX

A note on the determinants of foreign bank activity in London, between 1980 and 1989, 271
A simultaneous rational expectations model of the Australian dollar/US dollar market, 163
A stochastic dominance approach to evaluating alternative estimators of the variance for use in the Black–Scholes option pricing model, 377
A test of the cost of carry relationship for the Australian 90 day bank accepted bill futures market, 143
An empirical exploration of revisions in US national income aggregates, 59
An examination of open market stock repurchases: cash flow signalling, investments, and Tobin's Q, 9
An examination of the Oslo Stock Exchange options market, 103
Australian dividend reinvestment plans: an event study on discount rates, 551

Banks and income smoothing: an empirical analysis, 505
Betting bias and market equilibrium in racetrack betting, 287

Cointegration in interest rate futures trading on the Sydney future exchange, 251
Common stochastic trends, multivariate market efficiency and the temporal causal dynamics in a system of daily spot exchange rates, 495
Corporate bond maturity decision: an agency and transaction cost explanation, 443
Credit constraints and US households, 477

Demand for broad money in the UK, 393
Demands for short-term assets and liabilities by UK quoted companies, 413
Determinants of outsider excess returns from insider transactions and semi-strong form efficiency, 155
Dividend policy and stock price volatility: Australian evidence, 175
Does it matter how seigniorage is measured?, 293
Does seasonal adjustment distort tests of stationarity? Some small-sample evidence, 531

Economies of scale and scope in European banking, 367
Exchange rate uncertainty, consumption preferences and the currency denomination of external debt, 199

Financial deregulation, demand for narrow money and monetary policy in Australia, 301
Forecasting interest rates from financial futures markets, 449
Forecasting UK stock prices, 279

Heteroscedasticity in stock market indicator return data: volume versus GARCH effects, 337

Impact of anti-takeover amendments on corporate performance, 519
Impact of the Revenue Act of 1987 on master limited partnerships, 233
Inflation, real stock returns and monetary policy, 29
Inflation news in Australia: its effects on exchange rates and interest rates, 225
Interdependence of stock markets: evidence from Europe during the 1920s and 1930s, 243

Leases, debt and taxable capacity, 71
Loan-loss provisions and bank buffer-stock capital, 213
Long-term output growth as a predictor of stock returns, 421

On the application of the Black and Scholes formula to valuing bonds with embedded options: the case of extendible bonds, 37
One-touch double barrier binary option values, 343

Permanent and temporary components of Canadian stock prices, 259
Portfolio hedging and basis risks, 543

Regulation, deregulation and managerial behaviour: new evidence on expense preference in banking, 1
Risk praemia in Eurodollar futures prices, 49

Security price reaction to divestments by healthy and financially distressed firms: the case of MBOs, 85
Signalling in UK capital markets, 511
Stock price volatility: tests for linear and non-linear cointegration in the present value model of stock prices, 487
Stock returns, real activities and temporary and persistent inflation, 433

Testing for non-linearity in daily sterling exchange rates, 307
Testing memory patterns in the Spanish stock market, 401
Testing the Fisher effect as a long run equilibrium relation, 115
The causes and consequences of central bank money supply decisions: evidence from Africa, 121
The dynamics of interest rates between Eurodollar and domestic US Dollar, 347
The effect of bond plus equity warrant issues on underlying asset volatility: an empirical analysis with conditional and unconditional volatility measures, 327
The effects of the fundamentalists' and chartists' expectations on market survey, 363
The monetary approach to the exchange rate: long-run relationships, coefficient restrictions and temporal stability of the Greek Drachma, 351
The proportionality of financial ratios: indications for ratio classification, 535
The regulation of insider dealing in the UK: some empirical evidence concerning share prices, merger bids and bidders' advising merchant banks, 383
The relative performance of the PER and PSR filters with stochastic dominance, evidence from the Taiwan Stock Exchange, 19
The stable Paretian hypothesis and the frequency of large returns: an examination of major German stocks, 463

Uncertainty and overconfidence in time series forecasts: application to the Standard & Poor's 500 Stock Index, 189
Using chaos measures to examine international capital market integration, 91

Who's afraid of international deregulation? Belgian credit institutions' policy preferences, 319
